## PROJECT OVERVIEW

fall 2024

KDOT is completing early design work for a project that will replace the U.S. 24 bridges over Goodyear Road in north Topeka. This project is part of the KDOT Priority Bridge Replacement Program.

Replacement of the existing two bridges is necessary, as the structures are at the end of their service life. The project will reduce future maintenance needs and enhance connectivity from U.S. 24 to area businesses, homes and community locations.

The latest project information will be made available on the project webpage: [ike.ksdot.gov/us24-bridges-goodyear-road](http://ike.ksdot.gov/us24-bridges-goodyear-road)

 Project location

**IKE—The Eisenhower Legacy Transportation Program**—is a nearly \$10 billion investment in the future of Kansas. This 10-year program and the transportation improvements it will deliver play a key role in making roads safer, supporting economic growth and creating more options and resources for Kansans and their communities.

## PROJECT DETAILS

<b>Scope</b>	Replacing two existing bridges, which involves roadway design, bridge design, traffic analysis, traffic modeling, developing a Transportation Management Plan, and community engagement.
<b>Status</b>	Early design

## PROJECT CONTACTS

## **PRIORITY: Collaboration**

KDOT is coordinating with the City of Topeka and Shawnee County on the replacement of the two bridges. Planned improvements are in alignment with the City of Topeka Comprehensive Plan 2040. The areas surrounding the U.S. 24 interchange are expected to remain primarily as commercial and industrial land uses.

The City of Topeka is also supporting improvements to this same location. In 2023, the City reconstructed the pavement on N.W. Goodyear Road between the ramps at its intersection with N.W. U.S. 24 highway, just north of Topeka's Goodyear Tire & Rubber Co. plant.

## **COMMUNITY: Open House**

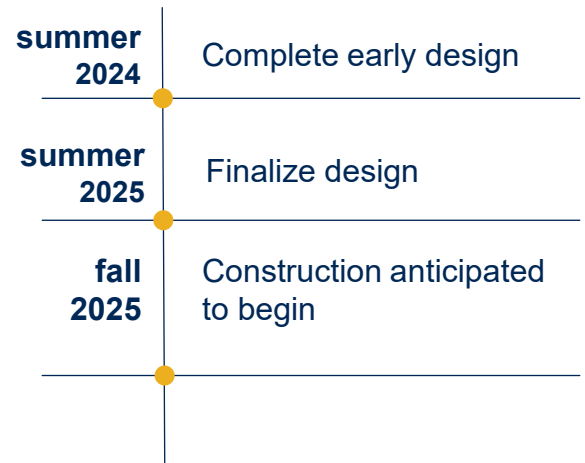

KDOT planned and hosted an informational open house in November 2024. Members of the public attended to learn more about the U.S. 24 Bridges over Goodyear Road project and meet the project team. Information was also available about other projects that are being planned and in construction along the Topeka U.S. 24 and I-70 corridors.

Details of the public meeting are shared and posted to the project website and KDOT social channels.
