

Land Use Planning

- Re-evaluate local plans relating to growth and development/re-development of the community along the highway.

Enhance Traffic Flow

- For all vehicle types – cars, passenger trucks, school buses, semis
- For all travel directions – north, south, east, west
- At intersecting streets and along the highway

Economic Development

- New commercial or residential development along the corridor.
- Expansion of current businesses along corridor.
- Enhancements to better accommodate freight needs.

Many other opportunities were listed at specific locations: pedestrian access, additional roadway capacity, land development, improved drainage, geotechnical assessment, improved pavement marking, improved signage, improved view, noise mitigation, separating local and through traffic, speed management, and potentially closing some intersecting streets.
